Reg No:192211145

The screenshot shows the Microsoft Azure App Services dashboard. The top navigation bar includes the Microsoft Azure logo and a search bar. Below the navigation bar, there's a section for 'App Services' with a 'Create' button and a 'Manage Deleted Apps' button. A filter bar shows 'Subscription equals all', 'Resource group equals all', and 'Location equals all'. Below the filter bar, a table header is visible with columns: Name, Status, Location, Pricing Tier, App Service Plan, Subscription, and App Type. The table is currently empty, displaying a message: 'No app services to display'. Below this message, there's a description: 'Create, build, deploy, and manage powerful web, mobile, and API apps for employees or customers using a single back-end. Build standards-based web apps and APIs using .NET, Java, Node.js, PHP, and Python.' and a link to 'Learn more about App Service'.

The screenshot shows the 'Create Web App' wizard in the Microsoft Azure portal. The wizard is divided into several tabs: Basics, Deployment, Networking, Monitoring, Tags, and Review + create. The 'Basics' tab is selected. The 'Project Details' section asks for a subscription (Azure for Students) and a resource group (sathwik). The 'Instance Details' section asks for a name (sathwikyadav), a publish method (Code), a runtime stack (Go 1.19 (Experimental)), and an operating system (Linux). The wizard concludes with a 'Review + create' button and a 'Next: Deployment >' button.

## Your web app is running and waiting for your content

Your web app is live, but we don't have your content yet. If you've already deployed, it could take up to 5 minutes for your content to show up, so come back soon.

Haven't deployed yet?  
Use the deployment center to  
publish code or set up continuous  
deployment.
