Reg No:192211145

The screenshot shows the Microsoft Azure portal interface. The browser address bar displays the URL: `portal.azure.com/#view/HubsExtension/BrowseResource/resourceType/Microsoft.Workloads%2FsapVirtualInstances%2FdatabasesInstances`. The page title is "Databases for SAP solutions". Below the title, there are filters for "Subscription equals all", "Resource group equals all", and "Location equals all". A message states "Showing 0 to 0 of 0 records." Below this, a table with columns "Name", "Status", "Environment", "Virtual machines", "SID", "App location", and "Tags" is shown, but it is empty. A large message in the center says "No Databases for SAP solutions to display" with a subtext: "Database is part of a Virtual instance for SAP solutions. Try changing or clearing your filters. You can also Create a Virtual instance for SAP solutions that runs on Azure to take advantage of the best that Azure has to offer." A "Create" button and a "Learn more" link are present. A "Give feedback" link is at the bottom right.

The screenshot shows the "Create Virtual Instance for SAP solutions" form. The form is divided into sections: "Basics", "Virtual machines", "Visualize Architecture", "PREVIEW", "Tags", and "Review + create". The "Basics" section is active. It contains fields for "Subscription" (set to "Azure for Students"), "Resource group" (set to "sathwik_group"), "Name (SID)" (with a hint to enter a three-character SAP System Identifier), "Region" (set to "Asia Pacific Central India"), and "Environment type" (with "Production" selected). At the bottom, there are buttons for "Review + create", "Previous", and "Next: Virtual machines". A "Give feedback" link is at the bottom right.
